

## **Baston**

## **Site Biodiversity Action Plan**

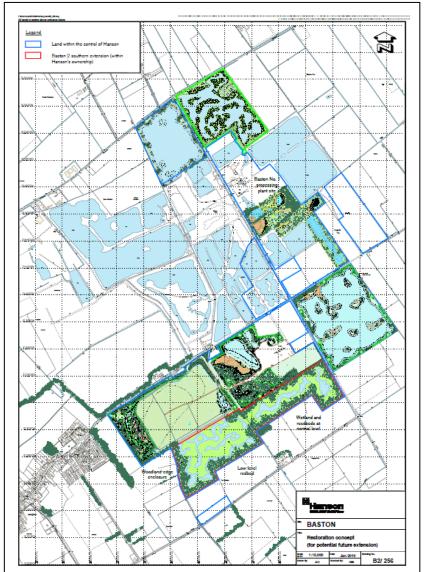

| Prepared: 2011 | Updated: 2013 |
|----------------|---------------|
|                |               |

## Site Information- Baston

| Olta Mana and   | Destas Ousers Lisselschier (TE400454)   |  |  |  |
|-----------------|---|--|--|--|
| Site Name and   | Baston Quarry, Lincolnshire (TF139154)  |  |  |  |
| Location (incl. |   |  |  |  |
| Grid Ref.)      |   |  |  |  |
| Hanson          | HANSON AGGREGATES – CENTRAL   |  |  |  |
| Company         |   |  |  |  |
| BAP(s) that     | National BAP  |  |  |  |
| will be         | Lincs BAP   |  |  |  |
| targeted        |   |  |  |  |
| Habitat(s) to   | Reedbed   |  |  |  |
| be developed    | Standing open water and canals  |  |  |  |
| •               | Wetlands (Fen, grazing marsh, reedswamp)  |  |  |  |
|                 | Broadleaved Wet Woodland  |  |  |  |
| BAP species     | Bittern   |  |  |  |
| to be           | Water Vole  |  |  |  |
| encouraged      |   |  |  |  |
| Designated      | The Fens  |  |  |  |
| Natural Area    |   |  |  |  |
| Background      | Baston Quarry -A working a fluvial sand and gravel deposit .  |  |  |  |
| and site        | The site is being restored to create over 20 ha of new reedbed, constructed in  |  |  |  |
|                 | •   |  |  |  |
| description     | phases as the quarrying of the site progresses. The remaining areas of the nature   |  |  |  |
|                 | reserve will comprise a matrix of high-grade agriculture, broadleaved woodland,   |  |  |  |
|                 | scrub and wetland habitats including wet woodland, fen, reedswamp and grazing   |  |  |  |
|                 | marsh.<br>The site is been to supply a function of a state of a st |  |  |  |
|                 | The site is home to a number of protected species including badger, bat, water vole                                       |  |  |  |
|                 | and barn owl.   |  |  |  |
| National        | SSSI - Cross Drain Ref:1002856  |  |  |  |
| Designations    | http://www.sssi.naturalengland.org.uk/special/sssi/sssi_details.cfm?sssi_id=1003003                                       |  |  |  |
| (SSSI, SAC,     |   |  |  |  |
| SPAs,           |   |  |  |  |
| RAMSARs and     |   |  |  |  |
| NPs) within     |   |  |  |  |
| 500m            |   |  |  |  |
| Resource        | Pre-strip ecological surveys and protection of existing habitats are a requirement of                                     |  |  |  |
| Requirements-   | planning conditions and legislation. Restoration works are part of an approved  |  |  |  |
| comment on      | scheme.   |  |  |  |
| cost if         |   |  |  |  |
| appropriate     |   |  |  |  |
| Contribution    | The site will create a large area of national priority habitat and will hopefully attract a                               |  |  |  |
| to biodiversity | population of breeding bittern.   |  |  |  |
|                 | The other areas of restoration will create habitat capable of supporting other BAP  |  |  |  |
|                 | target and non-target species including Water Vole, Otter, Bearded Tit, Cetti's   |  |  |  |
|                 | Warbler and Barn Owl.   |  |  |  |
| Partners and    | Lincs' Fens Trust   |  |  |  |
| Local           |   |  |  |  |
| initiatives     |   |  |  |  |
| Other           | Hanson Planning Applications.   |  |  |  |
| documents       |   |  |  |  |
| supporting the  |   |  |  |  |
| site BAP        |   |  |  |  |
|                 |   |  |  |  |

## Action Plan

| ltem<br>No. | Objective                                     | Biodiversity<br>Feature                            | Targets   | Tasks  | Assessing<br>Indicator                               | Responsible<br>Person   | Timescale<br>(Completion)         |
|-------------|---|--|---|--|--|-------------------------|-----------------------------------|
| 1           | Restore<br>important<br>habitats.             | (A) Reedbed.                                       | Create 20+ ha of reedbed.   | Design and construct reedbeds<br>with overburden and soils from<br>stripping operations, each with<br>reed edge, reed area and open<br>water,to be inoculated with<br>reeds by planting, rhizome<br>spreading or other approved<br>establishment method. | Area of reedbed<br>created                           | Landscape<br>Architect. | Report area                       |
| 2           | Restore<br>important<br>habitats.             | (B) Standing open water<br>and canals.             | Create 50 ha open water.  | Design and construct reedbed-<br>fringed water areas in<br>accordance with approved<br>scheme and incorporating<br>design features to improve<br>biodiversity value where<br>possible.   | Area of open<br>water created<br>(ha).               | Landscape<br>Architect. | Report annually for life of site. |
| 3           | Restore<br>important<br>habitats.             | (C) Wetland (Fen,<br>Grazing Marsh,<br>Reedswamp). | Create20 ha of marginal<br>wetland around reedbeds<br>and water bodies. | Design and restore reedbed<br>marginal areas ("blue zone").<br>Landforming and levels to allow<br>seasonal inundation by water to<br>allow natural wetland habitat<br>development. Grazing areas to<br>be restored by cultivation and<br>seeding.        | Wetland margins<br>created – land<br>area (ha).      | Landscape<br>Architect. | Report annually for life of site. |
| 4           | Restore<br>important<br>habitats.             | (D) Broadleaved Wet-<br>woodland                   | Plant 3ha new broadleaved woodland.                                     | In accordance with outline<br>restoration scheme, design and<br>plant woodland.  | Woodland area planted (ha).                          | Landscape<br>Architect. | 1ha every 5<br>years.             |
| 5           | Consult with<br>BAP partner<br>organisations. | Reedbed and whole wetland site restoration.        | Maintain contact with Trusts.   | Continue design,<br>implementation and aftercare<br>consultation with MPA.   | Attendance of<br>meetings between<br>Hanson and MPA. | Landscape<br>Architect. | As necessary                      |

| 6 | Encourage<br>rare species. | Bittern.             | Attract booming males and nesting pairs to site.                | Through construction and<br>establishment of reedbed (target<br>1A), and associated open water<br>features (target 1B), create<br>conditions suitable for<br>colonisation by Bittern.   | Number of<br>booming males.<br>Number of nesting<br>pairs. | Site Manager,<br>Landscape<br>Architect.                          | Monitor and<br>report any<br>sightings for life<br>of site. |
|---|----------------------------|----------------------|---|---|--|---|---|
|   |                            | Water Vole and Otter | Species noted on site either<br>by site staff or third parties. | Through construction and<br>establishment of wetland<br>features, channels and open<br>water, as per target item 1,<br>create suitable conditions for<br>colonisation of site by water vole<br>and otter, as indicators of<br>general wetland restoration<br>success. | Individuals<br>spotted on site.                            | Site Manager,<br>Hanson Site<br>Staff,<br>Landscape<br>Architect. | Sightings report<br>for life of site.                       |
| 7 | Protect<br>species.        | Bat, Barn Owl        | Maintain existing owl and bat boxes.                            | Monitor condition of owl and bat<br>boxes on site and replace/repair<br>as necessary. Consider<br>opportunities for additional<br>features during site<br>development.  | Boxes monitored annually.                                  | Hanson Site<br>Manager,<br>Landscape<br>Architect.                | Sightings report<br>for life of site.                       |
